Head of BI & Performance Marketing / Paid Growth Operator

\$30M+ media directed · Cash MER allocation · CEO / CMO stakeholders

SUMMARY

Paid and BI operator who moves budget from cash contribution—not from platform ROAS decks. Continuous W-2 paid+measurement track since Aug 2024 (Nutricost → Black Clover USA). At Black Clover USA (~\$45M global apparel): report to the CEO, own company dashboards and the Google/Meta/Microsoft mix, present then allocate against cash MER, CAC, LTV, and blended efficiency; cut below break-even. Built the ~50-user sales portal (users, not reports) on NetSuite. Prior Nutricost: multi-channel paid (Amazon/Google/Meta/TikTok) for the CMO; grew Ketologic/Primaforce sub-brand paid scale. Concurrent evenings-compatible: CEO, McFly Ads since 2020 (named brands; marketing data-science company). \$30M+ media directed. Measurement stack (Meridian, Robyn, GeoLift) exists to fund the next dollar—not to decorate a slide.

EXPERIENCE

Head of Business Intelligence & Performance Marketing

Black Clover USA · Feb 2025–Present (~18 months) · Reports to CEO · W-2

- Global apparel, ~\$45M year, hundreds of employees. Own BI + paid. Present the call to the CEO, then allocate Google / Meta / Microsoft against cash MER, CAC, LTV, and blended efficiency from NetSuite. Below cash MER break-even, cut.
- Meridian Bayesian MMM + GeoLift geo-holdouts/RCTs when channels fight over the same sale—GeoLift/MMM changed the mix. Direct a seven-figure monthly paid mix for ~18 months from the finance desk, not from in-platform ROAS.
- Built a sales portal used by ~50 users (execs, rep leads, reps)—portal users, not headcount or direct reports. Live NetSuite, tiered access, CRM-style messaging. Google Cloud Run when the desk ships as an app.
- Led social media manager, graphic designer, and international advertising leads across Asia, UK, Canada, and Australia.
- Ops stack: Snowflake, dbt, Airflow → NetSuite; R / SQL / Python; Looker, Domo, Tableau.

Performance Marketing & Analytics Lead

Nutricost · Aug 2024–Feb 2025 (~7 months) · Reports to CMO · W-2

- Ran Amazon, Google, Meta, and TikTok for the brand and sub-brands; scaled Ketologic and Primaforce from \$50/day to \$1,000/day. McFly Ads (CEO since 2020) stayed concurrent evenings-compatible through this seat.
- Robyn MMM + GeoLift for budget calls when platforms claimed the same order—test decided budget, not last-click. Presented to CMO.
- MTA, LTV, CAC, and cohorts in BigQuery so weekly CMO meetings started from one desk on blended efficiency (GA4, Looker Studio, SQL / R).

CEO

McFly Ads · Apr 2020–Present · Concurrent with W-2 roles (evenings-compatible; company did not pause)

- Built and ran marketing data-science desks for named brands: paid allocation, cash MER, Robyn/Meridian, GeoLift, ~\$10K Looker/Tableau executive dashboards and retail command centers. Operators got measurement readouts that drove allocation—presented to technical and non-technical stakeholders.
- Named brands include Marksman Construction, Malama Solar, Stretch Labs, Kin Home, +6 more.
- McFly Analytics Shopify app (listing pending): cash MER + Shopify-API LTV—mcflyads.com. \$30M+ media directed career.

SKILLS

Cash MER / budget allocation · CAC / LTV / blended efficiency · Performance marketing · Google Ads · Meta Ads · Microsoft Ads · Amazon Ads · TikTok Ads · Meridian · Robyn · GeoLift · SQL · Python · R · Snowflake · Looker · Tableau · NetSuite · Executive stakeholder management
