Marketing Measurement / Data Science

Bayesian MMM · GeoLift · Cash MER · \$30M+ media directed

SUMMARY

Marketing measurement that finance will fund. Six years building MMMs, geo-holdouts, and cash-MER desks—not path-credit theater. Continuous W-2 paid+measurement track since Aug 2024 (Nutricost → Black Clover USA). At Black Clover USA: Meridian Bayesian MMM and GeoLift RCTs over ~18 months on a Google/Meta/Microsoft mix, presented to the CEO before allocation. At Nutricost: Robyn MMM, GeoLift, and BigQuery MTA/LTV/cohorts over ~7 months across Amazon/Google/Meta/TikTok for the CMO. Concurrent evenings-compatible: McFly Ads CEO (Robyn/Meridian, GeoLift, Looker/Tableau desks) since 2020 across named brands. \$30M+ media directed. Stack fluent in R (cleaning, EDA, Bayesian MMM workflows / model diagnostics), SQL, Python, Snowflake, dbt, Airflow.

EXPERIENCE

Head of Business Intelligence & Performance Marketing

Black Clover USA · Feb 2025–Present (~18 months) · Reports to CEO · W-2

- Meridian Bayesian MMM + GeoLift over ~18 months on Google, Meta, and Microsoft: geo-holdouts, geo-testing, and RCTs when two channels claimed the same sale—experimental methods and causal inference for the CEO. GeoLift/MMM changed the mix; below cash MER break-even, cut.
- Present measurement → allocate. Cash MER from NetSuite orders vs paid is the KPI; platform ROAS is not the budget. Direct a seven-figure monthly paid mix for ~18 months on a ~\$45M apparel year.
- Warehouse → decision: Snowflake, dbt, Airflow into NetSuite; R for cleaning, EDA, and Bayesian MMM workflows / model diagnostics (Meridian); SQL and Python; BI in Looker, Domo, Tableau; Cloud Run for app-shaped desks.
- Built a ~50-user sales portal (portal users—not reports or company headcount): live NetSuite, tiered access. Led social media manager, graphic designer, and international advertising leads (Asia, UK, Canada, Australia).

Performance Marketing & Analytics Lead

Nutricost · Aug 2024–Feb 2025 (~7 months) · Reports to CMO · W-2

- Robyn MMM + GeoLift over ~7 months on Amazon, Google, Meta, and TikTok. Incrementality when platforms claimed the same order—the test decided budget, not last-click. Presented to CMO. R for cleaning, EDA, and Bayesian MMM workflows / model diagnostics (Robyn).
- Multi-touch attribution, LTV, and cohorts in BigQuery (SQL / R) so contribution lived beyond last-click. GA4 + Looker Studio for the weekly desk.
- Scaled Ketologic and Primaforce \$50 → \$1,000/day inside a multi-channel paid book across Amazon, Google, Meta, and TikTok. McFly Ads concurrent since 2020 (evenings-compatible) through this seat.

CEO

McFly Ads · Apr 2020–Present · Concurrent with W-2 (evenings-compatible)

- Six years marketing data science: Robyn and Meridian MMMs + GeoLift / causal inference since 2020 across named brands; ~\$10K data-science executive dashboards in Looker and Tableau; paid allocation for named brands.
- Operators across named brands got MMM/GeoLift measurement readouts that drove allocation—presented to technical and non-technical stakeholders.
- Named brands include Marksman Construction, Malama Solar, Stretch Labs, Kin Home, +6 more.
- McFly Analytics (Shopify App Store listing pending): cash MER + Shopify-API LTV—mcflyads.com. \$30M+ media directed career.

SKILLS

Meridian (Bayesian MMM) · Robyn · GeoLift · Causal inference / RCTs · Cash MER · Experimental design · SQL · Python · R (cleaning / EDA / Bayesian MMM diagnostics) · Snowflake · BigQuery · dbt · Airflow · Looker · Tableau · NetSuite · MTA / LTV / cohorts

EDUCATION

Utah Valley University — Bachelor of Science (Data Science and Statistics emphasis)
