Head of Business Intelligence & Performance Marketing

\$30M+ media directed · Cash MER, Bayesian MMM, GeoLift · Reports to CEO

SUMMARY

Operator who funds marketing from finance, not platform ROAS. Continuous W-2 paid+measurement track since Aug 2024 (Nutricost → Black Clover USA). Head of BI & Performance Marketing at Black Clover USA (~\$45M apparel, global, hundreds of employees)—report to the CEO, present the mix call, then allocate. Stack: Meridian Bayesian MMM, GeoLift geo-holdouts/RCTs, cash MER vs NetSuite. Prior: Performance Marketing & Analytics Lead at Nutricost (Amazon/Google/Meta/TikTok; Robyn, GeoLift, BigQuery MTA/LTV). Concurrent evenings-compatible: CEO, McFly Ads (marketing data science since 2020; named brands). \$30M+ media directed career.

EXPERIENCE

Head of Business Intelligence & Performance Marketing

Black Clover USA · Feb 2025–Present (~18 months) · Reports to CEO · W-2

- Own company analytics and paid allocation for global apparel (~\$45M year, hundreds of employees). Present to the CEO, then allocate Google / Meta / Microsoft against cash MER from NetSuite—not platform ROAS. Below cash MER break-even, cut.
- Meridian Bayesian MMM and GeoLift geo-holdouts/RCTs changed the mix when channels claimed the same sale—causal call for the CEO, then reallocate. Direct a seven-figure monthly paid mix for ~18 months from measurement, not last-click.
- Built a sales portal used by ~50 users (executives, rep leads, reps)—portal users, not headcount or direct reports. Live NetSuite, tiered access, CRM-style messaging.
- Player-coach: led social media manager, graphic designer, and international advertising leads (Asia, UK, Canada, Australia).
- Finance desk: Snowflake, dbt, Airflow → NetSuite; R / SQL / Python; Looker, Domo, Tableau; Google Cloud Run when the desk ships as an app.

Performance Marketing & Analytics Lead

Nutricost · Aug 2024–Feb 2025 (~7 months) · Reports to CMO · W-2

- Owned multi-channel paid book (Amazon, Google, Meta, TikTok) for the brand plus sub-brands Ketologic and Primaforce—grew sub-brand paid scale inside that book. McFly Ads (CEO since 2020) stayed concurrent evenings-compatible through this seat.
- Robyn MMM on the four-platform book; GeoLift when Amazon / TikTok / Meta claimed the same order—test decided budget, not last-click. Presented to CMO.
- MTA, LTV, and cohorts in BigQuery (SQL / R); GA4 and Looker Studio for the weekly CMO desk.

CEO

McFly Ads · Apr 2020–Present · Concurrent with W-2 roles (evenings-compatible; company did not pause)

- Marketing data-science company: Robyn and Meridian MMMs, GeoLift / causal inference, custom ~\$10K executive dashboards (Looker / Tableau), retail command centers, paid allocation for named brands. Operators got measurement readouts that drove allocation—presented to technical and non-technical stakeholders.
- Named brands include Marksman Construction, Malama Solar, Stretch Labs, Kin Home, +6 more.
- McFly Analytics submitted to Shopify App Store (listing pending): cash MER and Shopify-API LTV—mcflyads.com. Career: \$30M+ media directed.

SKILLS

Cash MER · Meridian (Bayesian MMM) · Robyn · GeoLift / incrementality · SQL · Python · R · Snowflake · BigQuery · dbt · Airflow · Looker · Tableau · Domo · NetSuite · Google / Meta / Microsoft / Amazon / TikTok Ads · Google Cloud Run

EDUCATION

Utah Valley University — Bachelor of Science (Data Science and Statistics emphasis)
